Software you need

Drivers for the machine can be downloaded from Ricoh's Website:

□ http://www.ricoh-usa.com

Enter the numeric model number in the search box.

Specify your Operating System.

Choose a PCL 5 or 6 driver unless you know that you need a Postscript driver

When Downloading drivers from the web you must run the downloaded file to extract the driver for use. Remember where you put them you will need this information later.

Next Start the Add Printer Wizard

- ■Hold the Windows key and press the "x" key.
- Then select Control Panel
- Then select <u>View devices and printers</u>
- Then select Add a printer at the top of the screen

On the following slides follow the notes on the side bar, Or select the buttons that are in the red boxes.

Click "Stop", then "The printer that I want isn't listed."

Select "Add a printer using a TCP/IP address or hostname

In the Hostname or IP address field type in the IPv4 address from the configuration Page (#1). The Port name field will automatically fill and be sure the "Query the printer" box is unchecked.

Click on Have Disk...

Click on Browse...

Browse to the location you extracted the driver to after you downloaded and ran it. When you have found the location of the driver Hit the Open Button.

Click on OK

Choose the model that corresponds to your Ricoh and click Next.

Name the printer whatever you want and click Next.

Click the radio button next to Do not share this printer and click Next.

If you want this set as your default printer make sure the box near the top is checked and click Finish.

If you chose to print test page you will get a confirmation box looking like this one, click Close to proceed.

Configuring Options

You should be back in the Devices and Printers Window

Right click on the Printer you just installed and Left click Printer Properties.

If you installed the PCL driver click the Accessories tab.

On this page you will need to click the box next to the options the configuration page you printed earlier has and click OK.

DONE!!!
